Education

MS	National Tsing Hua University , College of Technology Management - GPA: 4.12/4.3 - Relevant Coursework: Service Security (A+), Computational Statistics (A+), Text Mining (A+)	Sept 2024 – Present Exp. Jun 2026
EXG	Technical University of Munich - German Scale: 1.3 (3.9/4.0 GPA) - Relevant Coursework: Business Analytics (A/A+), Reinforcement Learning (A/A+)	Apr – Sept 2023
BS	National Cheng Kung University , Foreign Languages & Literature (FinTech Program) - GPA: 4.0/4.3 - Relevant Coursework: Quantitative Data Processing (A+), Data Mining (A), Data Structures (A)	Sept 2019 – Mar 2024

Experience

Micron Technology — Business Planning Intern - Developed internal Streamlit web tools with Autogen LLMs and Plotly dashboards for real-time wafer production analysis and HBM/non-HBM forecasting - Reduced LLM query response time 75% (4s → 1s) via prompt hashing and SQLite3 caching, boosting analyst productivity - Built interactive features for dynamic week-range selection and process distribution visualization	Taichung, Taiwan Jul–Aug 2025
---	----------------------------------

Projects

AcaRadar — Full-stack Web App for Cross-Domain Academic Paper Discovery - Led design & implementation solving fragmented research discovery; users embed interests to auto-retrieve latest arXiv metadata - Architected backend with Domain-Driven Design, Repository patterns, and result monads; built RESTful APIs - Integrated AWS SQS for scalable, asynchronous microservices improving resilience - Best practice with RuboCop enforcement, high Minitest coverage, GitHub Actions CI/CD, collaborative Git workflows	github.com/orgs/UpstartSangria 🔗
MindBigData — EEG-Based Digit Classification Web App - Built computer vision models with EEG preprocessing (ASR, bandpass filtering, ICA) using PyTorch - Deployed interactive Streamlit app for real-time classification from uploaded EEG files - Live demo: bci-deploy.streamlit.app 🔗	github.com/MNISTMindBigData 🔗

Publication

Hybrid Electric Vehicle Sales Prediction using ANN, ANFIS, and E-Word-of-Mouth

NSTC Grant Feb 2023

- Achieved highest accuracy with ANFIS model incorporating E-WOM sentiment and volume features
- Demonstrated significant forecasting improvements via social media signal integration
- [NSTC 112-2813-C-006-026-H](#) 

Skills & Languages

Programming: Python, Ruby, R, SQL

Frameworks & Tools: PyTorch, Streamlit, Autogen (LLMs), Plotly, AWS SQS, Git/GitHub Actions

Data & Visualization: Tableau, Power BI, Text Mining, Computational Statistics

Languages: Native Mandarin • Fluent English (TOEFL 107/120) • Intermediate German (Goethe B1)
